

## **NOVEL TECHNOLOGIES FOR HANDLING, PRESERVING, STORING AND ANALYSING FORENSIC DNA SAMPLES**

Rolf Muller, Ph.D.

Biomatrica Inc., 5627 Oberlin Drive, Suite 120, San Diego, CA 92121

This presentation will describe a novel and highly cost-effective approach to handling forensic DNA samples isolated from materials collected at a crime scene or from donors. We will also provide published validation studies conducted by forensic scientists, as well as adoption and integration of these technologies into case work protocols in some crime laboratories.
